

PANELIST, WEBINAR #4

Data Management & Analytics for Carbon Accounting and Reporting

James Adams
Lead Consultant,
KWA Analytics

James is a lead consultant at KWA Analytics specializing in trading and risk technology solutions for clients in the energy and commodities space.

James has worked with a variety of clients in the gas, power, and oil markets. Most recently he has been working with a large international energy company and supporting their modelling of voluntary emissions trading and reporting in their ETRM system. Before working in consulting, James worked for OpenLink where he was part of their product management team working on new solution features.

James graduated from Gettysburg College with a BS in Economics. He is completing his certificate in Finance and Clean Energy from the Yale School Of The Environment.
